

Brainstorms.....

With Ferrin Cox

Nine Alabama legislators who are teachers are being challenged for voting on the teacher career ladder plan (their own pay raise plan). We agree they shouldn't have done so, but then what about those who have spouses who are teachers... they shouldn't vote on the pay raise either.

Horse racing fans will immediately recognize Spend-A-Buck, winner of the Kentucky Derby this year. It turned out that this nag also won the Jersey Derby Monday... and \$2.6 million to boot! There was of course criticism from those who felt his owner committed a sin by not following tradition -- but then for \$2.6 million in cold cash, this country boy might break with tradition a bit also. What we are seeing with this big payout to the winner of a horse race, is that sport following in the direction many other sports have gone, and that is making millions out of a few at the price of a couple of dollars on the ticket of each spectator.

The news is still coming in and the body count continues, but in Bangladesh a hurricane and companion tidal wave have killed many thousands of people. Now those who lived through the tragedy have hard times ahead. Their annual income is less than \$150; life is fragile there to say the least -- the average lifespan is less than fifty years due to their harsh life. In fact, of the thousands who died in this tragedy, many will never be found, just listed as disappeared. If you are hunting a place to make your fortune, we suggest you forget this country next to India that once was called East Pakistan and is subject to storms pouring in from the Indian Ocean.

The NCAA has cited the University of Georgia for recruiting violations. It seems that an assistant coach gave a potential recruit a ride from one part of Atlanta to a high school in another part of town. Now if they are going to get that nit-picky, every college in the world would be guilty. If any children need a ride, I urge college personnel to transport them and hang the NCAA.

We got all set a couple of weeks ago when we saw an announcement on the tube that they were going to televise the "all new" Mike Hammer series. We got our book to read, got comfortable in our easy chair and waited. Oh, how disappointed we were to discover we were being shown a rerun and the star of "Mike Hammer" was still sitting in a British jail on drug charges. Needless to say we marked off the "all new" Mike Hammer because we had already seen them.

President Reagan and his new tax plan promise to boost the spending power of the American family. We are all for this but I have learned to be a little concerned any time the feds offer to do something for me, especially when we hear they say in the next breath they are going to actually increase the total tax take. We need a cut in our taxes but when they cut my percentage by two percent and eliminate the deduction for state income taxes, etc., I ain't got a chance!

MEL COOPER, director of the Alabama Ethics Commission, was guest speaker at the Elba Rotary Club Monday. Mayor Bob English was in charge of the program. During his speech Cooper noted that Elba was one of six or seven cities that his commission hasn't had to at least investigate during the past eleven years. His speech related the Watergate case that resulted in the resignation of President Nixon to ethics rules as we know them today.

Attorney General Addresses Vacation Plans/Time Sharing

By Charles A. Graddick
Attorney General

"You have already won one of the four (4) prizes listed below:
1) new automobile; 2) vacation for two valued at \$1,000; 3) microwave oven; 4) grandfather clock."

Does this offer sound familiar? It probably does, since thousands of consumers receive mailing of this sort every year.

The Attorney General's Office of Consumer Protection receives inquiries daily from Alabamians who want information on companies offering these "too good to be true" promotions. Generally, a trip to a resort area is required and an individual is subject to viewing vacation property. The usually involves a long sales presentation trying to sell time-sharing plans or condominiums to prospective buyers. The high pressure presentation sometimes ends with consumers signing contracts for obligations they are unable to meet.

The advertising of prizes by vacation promoters can be very misleading. The prizes are generally worth very little. A grandfather clock for instance, may be a "do it yourself" model made of plywood. The microwave oven could be a child's version.

Vacation promoters claim that the larger prizes are awarded. However, many promoters are running advertisements offering the same prizes for many different resort areas at the same time. Therefore, the odds are much greater than they would be for one resort.

We Receive Letters

The Attorney's General's Office of Consumer Protection offers these points for consumers to think about before visiting a resort selling time-shares:
1) Are you interested in purchasing vacation property or a vacation time-share plan?
2) Can you afford to spend the extra money (for gasoline, motel rooms, meals, etc.) to make the trip?
3) By law the promoter must state the value of the "prizes" awarded and what the odds are of winning the larger prizes.
4) Should you decide to visit the resort, don't be pressured into signing the contract on the spot.

Dear Editor,

I am a high school student from Hannover, West Germany. I have been living in Elba as an exchange student with Education Foundation for Foreign Study (EF), and I'm writing to thank everyone for helping me into your community. By living in Elba for the past nine months I have come to understand many things about America. I have been attending Elba High School where the teachers and other kids have been very friendly and supportive. They helped me to understand American phrases and many of your customs that are so different from mine in Germany. It has been fun to try so many new things like driving a car, going to the beach, attending band practice and going to Atlanta with the band. Frederike Dorough, the EFPS area representative for the area of Montgomery, has made it possible for me to participate in this exchange program in your town. She has been a very good counselor and organized many meetings and parties for us throughout this year. She has also planned and organized a trip to Washington, D.C. and New York City for us which was just great.

I guess I would most of all like to thank my host mother and father.

LETTER TO THE EDITOR
Dear Sir:
I would like to take this opportunity to express to Mrs. Martha Frances Stephens this agency's genuine appreciation for her dedicated service to the people of Coffee County and to the State of Alabama. Recently Mrs. Stephens retired with 25 years of service. She served as an employee of the Coffee County Department of Pensions and Security for 20 years and she served five years with the State Department of Pensions and Security in Montgomery. Mrs. Stephens was a valuable employee and served the people of Coffee County with success and just as important a day of fun and entertainment. The Band Boosters have worked hard to support our band and raise the necessary funds to keep the band at a high performance level. In the process we have to solicit help from the surrounding community and we appreciate all the help we have received. It is only through a combined effort of our school members and other people like the people of Elba who are interested in seeing that our students have the opportunity to participate in a band program.

Thank you again and we do appreciate the help you have given us.

Respectfully submitted,
Joan McCarroll, Sec.

PASTOR'S CORNER

DAVID RICHBURG
WHITEWATER BAPTIST CHURCH

"The fruit of the Spirit is love, peace, longuffering, gentleness, goodness, faith, meekness, temperance; against such there is no law." (Gal. 5:22-23)

The last three of the fruits of the Spirit, which verify that you are a Christian, point to inward relationships.

Faith - Fidelity. This particular fruit has to do with our obedience to God and loyalty to our fellowman. The person who bears this quality of life will be true to his promise and faithful to his task. Fidelity always has an object, as faithfulness to your marriage vows, or to the church. Our commitment to God leads to fidelity in two areas of our lives: stewardship and service.

We have no choice about stewardship! We are either faithful or unfaithful stewards. Faithfulness in service identifies us as being possessed by the Holy Spirit. Fidelity means that we will do what is right, whether we like it or not. We will be faithful to Jesus, His Church, and development of our lives for Him.

Meekness. It means we will be submissive to God's will. Jesus

promised the meek would inherit the earth. It also means that we are teachable. Why aren't more of church members enrolled in Bible study? They have no real hunger and thirst for God's Word and knowledge. This reveals an area of their lives which is not controlled by the Holy Spirit. The meek will give every area of their life over to the control of God.

Temperance. This means self-control or the power to take control of the tongue, stay the hand and foot, properly direct the eye, taste, affections and desires. It includes a firm hand on the temper.

If we are a Christian and not just religious, we will possess the presence of all the fruit of the Spirit in our lives. God will be in control and we will be separated from the works of the flesh.

ELBA JAYCEES HOLD

(Clockwise from top)

Approximately 600 people attended the Jaycees 7th annual Bluegrass Music Festival held in Elba recently, according to festival chairman Kenneth Calhoun. People of all ages gathered at the Hawkins-Williams Recreation Park to enjoy the festivities.

This Tuscaloosa man was among the vendors who brought their wares to Elba for the Bluegrass festival. He said he is a regular at bluegrass festivals, but in the fall you can find him making his sales at University of Alabama football games.

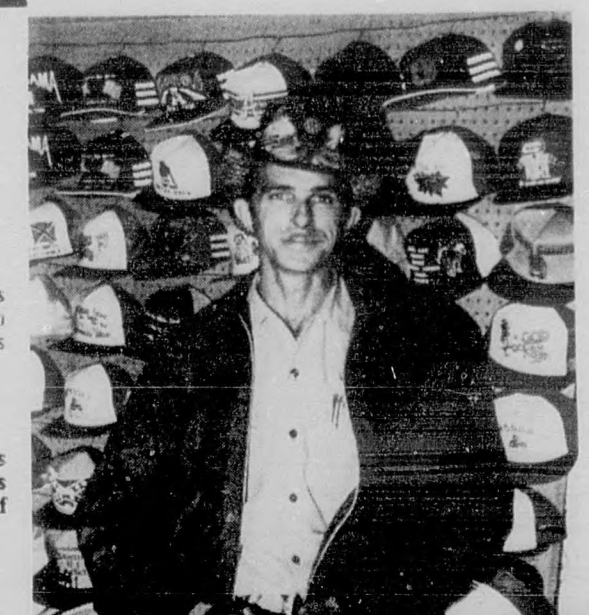

This crowd of teenagers did not mind taking time to smile "Hi, Mom!" into the camera.

People came from near and far to hear the music of the six featured bands, participate in the buck dancing contest, or just visit with the crowd.

One of the highlights of Saturday night events was the presentation of Miss Bluegrass pageant winners. Shown talking to the emcee is Miss Bluegrass Tab Bryan, while runners-up Jill Maddox and Toni Hudson look on.

Mrs. Penny Wright, a chief of a division of the Creek Indian tribe from New Brighton, spoke to Mrs. Pat Powell's Indian Education Class recently. Poem SENIORS

BY: RHONDA SENN

The word "Seniors" has a special place within each of our hearts. Because we know that the time is near.

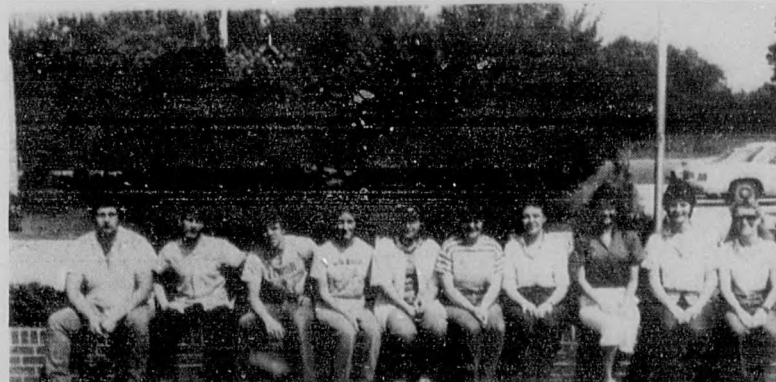

We realize that it's the final event The end of our race. Or have we just changed lanes Ready to pick up pace.

We've looked forward to being a senior With smiles and fears. But as this year slowly goes We have left only tears.

For all the memories of good and bad Can not fill the space. Of joy and pride we have Being of and in this place.

But whatever plans we have ahead We know this race is run. And nothing we can say or do Can change what we have done.

As seniors we want to look back At this place. The teachers and the friends, And realize that we are a part Of the memories that have been.

Annual Staff Members Begin Rebel 86

The annual staff members who participated were Krista Dyess, Teresa Holcomb, Chris Carney, Julie Davis, Beth Murphy, Cynthia Williams, Leah Grissett, Richie Rugg, Chris Hodge, and Tabetha Rodgers.

Nearing The End

It's about that time to say goodbye To all of the things at Elba High.

We've been together for twelve long years And when it's all over there will be many tears.

The friendships that we made are all so dear, And wherever we may go they will always be near.

We've all done some things that we will never forget, But each and everyone of them we will never regret.

We will never forget all the fun we have had, Nor the times and days when everything was bad.

May thirty-first is that special day When we're all last together before going our own way.

The thoughts of each other will stay in our hearts, Even though the miles will keep us apart.

And when years have passed and nothing seems the same, We will all have those memories that will always remain.

Harrelson Is Editor For "Tiger Tracks"

Marty Harrelson has recently been appointed editor of "Tiger Tracks" for the 1985-86 school year. Jill Maddox will serve as assistant editor.

Seniors Make Wishes

REGINA HUDSON

"Tiger Tracks" asked the seniors of 1985 to make one wish. They are as follows, and are identified by the senior's nickname. We hope all the wishes come true and that the class of 1985 gets only the best!

I wish that Alabama would win the national championship in football next year.

I wish the senior class would never have to depart.

I wish I had as many wishes as there are seniors; that way I could have a special one for each of them.

I wish I make it alright at Jax State, and maybe I could get a draft pick to U.S.F.L.

I hope the seniors of 1985 will become everything they ever wanted in life.

I wish for the class of '86 as many memorable times, happiness together and a successful senior year that the seniors of '85 have experienced our last year in school.

I wish for A's in college and all the seniors much success.

I wish that my parents would buy me a 1985 Dodge Turbo for graduation.

I wish that Johnny Sharpless and I could get married and have a great future.

I wish that the mark left by the class of '85 will always remain and our accomplishments will never be forgotten.

My wish is that the friendships and relationships we have made will continue on into the future.

I wish that nobody gets hurt but everyone "gets happy" at the beach graduation.

I wish that the United States and Russia would destroy all nuclear war heads so when I make my career in the United States Marine Corps, it will be a long one and I will not have to worry about war.

I wish that the 1984 Tigers could replay the last Brundidge game, anywhere.

I wish to play the Bulldogs again.

I wish we could throw off our caps when the graduation ceremony is finished.

I wish I had been able to play in the Brundidge playoff game.

I wish for God to watch over all the seniors while we're at the beach graduation.

I wish we could play Pike County one more time.

I hope the seniors of '85's class reunion will prove that after 12 long years of school we know how to handle life and in 1995 we are a success.

I wish the world could be a place filled only with true friends.

As a senior, I wish that EHS's learning environment was more like most larger schools instead of like a prison.

My one wish would be that all of my senior class would put all the bad things of the past behind them and come together as one.

I wish all the seniors of '85 could get together at the beach and have a party!!! And I do mean party!!!

I wish we could play Pike County again in football.

I wish I could have put what I wanted to in the paper!

I hope all of us seniors will have the fondest memories of our times spent together and that we will never forget our friends.

I hope all of the seniors get

Poem SENIORS

BY: RHONDA SENN

The word "Seniors" has a special place Within each of our hearts, Because we know that the time is near For all of us to part.

We realize that it's the final event The end of our race, Or have we just changed lanes Ready to pick up pace.

We've looked forward to being a senior With smiles and tears, But as this year slowly goes We have left only tears.

For all the memories of good and bad Can not fill the space, Of the joy and pride we have Being of and in this place.

But whatever plans we have ahead We know this race is run, And nothing we can say or do Can change what we have done.

As seniors we want to look back At this place, The teachers and the friends, And realize that we are a part Of the memories that have been.

The beautiful weather over the weekend was ideal for a trip to the beach or one's favorite fishing hole. However, at the Mularz house it was a perfect weekend to clean up around the yard, wash the car and take my daughter out to her swing. Yep, it was a great weekend!

DYL AND BR PLAYERS-OF-THE-WEEK

Last week was the hardest thus far in picking the top players, but after much thought I narrowed it down to a few players and then picked one in each league. Here are the top players for Week #4:
Dixie Youth League - the top player is Jamie Whitworth of the Astros. Jamie, a pitcher and catcher, pitched a two-hitter and struck out nine batters in a win over the Yankees, and also slugged two home-runs in two games to spark the Astros to a pair of wins.
Babe Ruth League - the top performance was turned in by Lamar Stokes, a left-handed pitcher for the Dodgers. Lamar pitched seven innings in a 9-1 win over the White Sox, allowing four hits and striking out 13 batters. He also got two hits, a double and a triple, to drive in four runs.

JAN MOORE IS OFF TO A FAST START IN LADIES SOFTBALL

When you play on a team that has a 2-5 record it's hard to get noticed... unless you're outstanding, which is certainly the case with Jan Moore! Jan, who plays for the Peoples Bank, has collected 16 hits in 18 at-bats, including three home-runs, and has scored 10 runs and driven in 10 runs. An .889 average speaks for itself, but when you add all the other stats, it's amazing.

FOOTBALL IS NEXT AT ELBA HIGH

The next sport at Elba High will be football, and it looks like a challenging season for the Tigers. Elba will open the season with home games against U.M.S. - August 31; Geneva - September 6; and Laverne - September 13; then travel to Opp - September 20, before returning home to meet Area 3 for Brundidge - September 27. After an open date on October 4, the Tigers will travel to Ozark - October 11, and then celebrate homecoming against Troy - October 18. Elba will close out the season against Andalusia - October 25 and Daleville - November 1, with both games being on the road.
 When the 1986-87 season opens, Elba will drop down to 3A and be in the Area with Daleville, Louisville and Clayton. As the student enrollment drops, Elba's football schedule will continue to change.

IRISH POTATOES
Irish potatoes harvested during the late spring and early summer normally do not keep well because of high temperatures. The ideal storage temperature is 55 to 60 degrees, and most of you do not have this kind of storage available. Here are some suggestions for reducing your losses in harvesting, handling and storing this crop:

HARVESTING: Do not harvest potatoes to be stored until the vines are mature—that is, until they start yellowing. Mature potatoes do not skin as easily as immature potatoes. Potatoes exposed to high temperatures do not keep well. Harvesting in the morning will avoid exposure to high field temperature. Do not leave newly harvested potatoes in the sun for any length of time. Handle potatoes carefully to cut down on skinning and bruising.

CURING: This is the process during which skinned and cut areas heal over. Better curing occurs in an area with fairly high humidity and a temperature of 60 to 75 degrees for two weeks.

STORAGE: Ideal storage temperature is 55 to 60 degrees; however, very few will have such a place. Potatoes can be kept for a period of six weeks at a temperature of 70 to 75 degrees. At 80 degrees and above losses are usually heavy. Do not store in a windy area.

PECAN LEAF PHYLLOXERA

Pecan Leaf Phylloxera is a small aphid-like insect that causes galls or tumor-like swellings on pecan leaves. These swellings will do very little harm to the tree and they do not harm to the tree and they are not a problem every year. There is no control that can be applied to them at this time. To control an insect spray has to be applied when the tree just begins to break buds. The timing of the spray is very critical for it to be effective.

CENTPEDE DECLINE
I have received numerous calls about centipedegrass this spring with the same general symptoms—yellowing and dead patches. I wish I could recommend preventative or curative treatments that would solve the problem. However, I do not have the answer nor does research. I offer you my recommendations for the problem.

We presently recommend two applications of fertilizer for centipedegrass (one in spring and the other in mid-summer). The type fertilizer used should be based on soil test results. If in doubt, apply 15-0-15. Do not over-fertilize whether intentionally or unintentionally (calibrate sprayer). One-half pound of actual nitrogen per 1,000 square feet (1½ pounds of ammonium nitrate) should keep most established lawns of centipedegrass with acceptable quality. However, if you need additional growth (dead spots and thin turf) the rate applied should be one pound actual nitrogen per 1,000 square feet both spring and mid-summer.

Keep phosphorus levels adequate but not excessive. Do not apply phosphorus unless the soil test specifically recommends it.

The mowing height should be no higher than 1½ inches from the soil surface. I prefer a cutting height of one inch. The closer the stolons are kept to the soil surface, the fewer winter survival problems.

In order to maintain the proper height in relation to the soil surface, thatch must be controlled. This should be done prior to the breaking of dormancy in the spring. Scalping with the mower and raking with a flexible rake is the most practical solution.

Collect clippings at each mowing. Research shows this to be an important management tool for healthy centipedegrass.

Chlorosis (yellowing) can be corrected with an application of iron sulfate in the spring (4 oz./1,000 square feet). Chelated iron will last

longer than the iron sulfate. However, research shows that centipedegrass sprayed several times during the growing season with iron to be more susceptible to freeze damage.

Centipedegrass is very susceptible to brown patch. Two or three applications of a good lawn fungicide in the spring should keep this disease under control. The first application should be applied immediately after dethatching with one or two applications following 10-14 days apart. Likewise, two applications in the fall should take the grass into the winter in a healthier condition. Make one application one to two weeks before the first killing frost, and another application one to two weeks after the first killing frost.

USDA Announces Support Levels Type For 1985 Peanuts

On May 21, 1985, the U.S. Department of Agriculture announced price support levels—by type, quality and location—for the 1985 peanut crop. Support is based on the previously announced national levels of \$559 per short ton for quota peanuts and \$148 per ton for additional peanuts.

Everett Rank, Administrator of USDA's Agricultural Stabilization and Conservation Service, said the quota support level by type, for an average grade ton of 1985-crop peanuts will be:

***\$543.02 for Virginia-type peanuts;

***\$565.91 for Runner-type peanuts;

***\$539.24 for Spanish-type peanuts;

***\$543.02 for Valencia-type peanuts from the Southwest area which are suitable for cleaning and roasting; and

***\$539.24 for other Valencias.

Rank said the method of computing differentials for the 1985 crop is the same as for the 1984 crop, except that a 4-year statistical base was used to project the expected percentages of extra large kernels in a ton of Virginia-type peanuts.

The actual support levels for an individual lot of peanuts depend on the percent of the various sizes of kernels in each ton and other factors.

For each percent of sound mature kernels including sound split kernels, the support level per ton is:

***Virginia-type peanuts, \$8.087;

***Runner-type, \$7.928;

***Spanish, type, \$7.968;

***Valencia-type, peanuts in the Southwest area suitable for cleaning and roasting, \$8.136; and

***other Valencias, \$7.968.

The loan value for additional peanuts is 26.48 percent of the applicable quota rate, Rank said. This factor represents the ratio of the \$148 per ton national support level for additional peanuts to the \$559 per ton national support level for quota peanuts.

Additional peanuts are those grown in addition to a farm's poundage quota or those grown on a farm with no poundage quota.

The final rule regarding the May 21 announcement was scheduled to appear in the May 22 Federal Register.

All Around Coffee County

SAFETY

We have dozens of farmers who are leaving empty fungicide, herbicide, and insecticide cans around machinery sheds and barns where young children can get to them. When I mention this to some of them, the usual answer is, "I don't have young children, so I don't care."

However, you never know when a neighbor's child or grandchild or some other person may be visiting your place and get in trouble.

Don't take a chance on poisoning some person. Dispose of these cans on your farm or take them to the landfill!

START NOW

Unfortunately, a lot of Coffee County peanut producers wait too late to begin leafspot control. We recommend starting leafspot control 30 to 45 days after planting or by June 1.

Georgia research has shown that early starting of fungicide applications pays. Some of their work showed that an application started the last week in May netted \$75 more than later starting dates. If your peanuts were planted back in mid-April to the first of May, go

ahead and begin your fungicide application now. On later planted peanuts start your leafspot control program as soon as the plants are hand size.

Leafspot control has a direct bearing on yield. Good leafspot control also lengthens the period when peanuts can be harvested safely. Don't take a chance. Begin your leafspot control.

COUNTY EXTENSION COUNCIL

The Director of the Extension Service, Dr. Ann Thompson, will be the featured speaker. I am anxious to have Director Thompson visit with the Coffee County Extension Council. I know that she will be impressed with the quality of the leadership and members of this group.

President Lowery is arranging special entertainment for the night. It is going to be an enjoyable occasion, and we hope to have all members of the Council attend.

BUYING AND STORING ONIONS

Now is the season for Vidalia onions. The name comes from the town in Georgia in the area where these sweet, mild onions are grown.

There are other mild onions available which are Bermudas and Sweet Spanish. For stronger flavored onions there are Globes and Creoles.

Cold storage isn't essential for onions, but dry storage is needed. With proper care, dry onions will keep for several months. They need a cool, dark, dry place with ventilation to keep them from sprouting and decaying.

This procedure appealed to me. It will recycle old pantyhose also. Tie and hang them in clean pantyhose with a knot between each onion.

Don't store onions with potatoes because they'll take on moisture from the potatoes and decay quickly.

HONEY
A homemaker called recently wanting to know how to use honey in recipes instead of sugar. The fact that honey takes moisture rapidly may or may not be an advantage. Fruit cakes, steamed puddings,

cookies and candies stay moist longer if made with honey. But some frostings, if made with honey, will remain soft and take up more moisture if the air is humid. This may make them too soft and sticky.

Extracted honey contains water which will affect the amount of liquid used in a recipe when honey is substituted for sugar. The liquid must be reduced.

If, for example, honey is substituted for all sugar, reduce liquid one-half. If honey is very thin or very thick, this proportion may have to be adjusted.

Bake your honey products at the lowest temperature possible. This prevents loss or change of flavor of the honey and also avoids too rapid browning.

CONVENIENCE FOOD
Many of us who have limited time and money often rely on convenience foods that are quick and easy to prepare. But these foods generally cost more than preparing from scratch.

Good buys in convenience food usually include frozen orange juice concentrate, frozen french-fried potatoes, instant non-fat dry milk, canned vegetables and some baked products made from a mix.

You can make some items cheaper at home. Prepare the food in advance and freeze it until needed. Pancakes, waffles, dinner rolls, plate dinners, spaghetti sauce, and lasagna are convenience foods you can make and freeze when you have

extra time.

HOUSE PLANT
A friend called our office for information on care of her corn plant *Dracaena*. That's the common name. The botanical name is *Dracaena fragrans* 'Massangeana'.

Medium to high light are required to produce the greatest leaf color. It can live for short periods of time in low light. Avoid full sun.

Keep plant soil moist, but do not overwater. It likes nice weather-temperatures between 65 and 80 degrees F. Apply a fertilizer to most *Dracaena* every three to four months. For the corn plant, apply fertilizer every six months when grown under low light.

Dracaena leaves vary in color from emerald to grey-green, with white or yellow stripes, or may be mottled with creamy yellow spots.

The corn plant may attain an indoor height of 20 feet or more. We have a Janet Craig *Dracaena* which needs care. I think it's getting too much morning sun. But it will grow four to ten feet or more. I'm moving it to a shady area, giving it a good pruning and shaping up. With a little care, I believe I can revive it.

FREEZING ENGLISH PEAS
You may call English peas, green peas, or garden peas, but I was brought up to call them English peas. Anyway, you freeze these peas by blanching two minutes in boiling water (one gallon of water to one pint of peas.) Chill. Pack. A lot of people like to cover their vegetables with ice water. This is a good procedure but is optional.

Crenshaw County Hospital To Present Program On Suicide

The psychiatric service of the Crenshaw County Hospital will host a program on "Adolescent Depression and Suicide" on June 18, 7-9 p.m. in the fellowship hall of the First United Methodist Church of Live Oak. The program will be presented by Donald Roman, M.D., clinical director of the psychiatric service, and Ms. Becky Southwell, R.N., M.S.N., a clinical nurse specialist from Mental Health Management, Inc., of McLean, Virginia.

The growing rate and incidence of adolescent suicide is a phenomenon that causes alarm in families, schools and communities throughout the nation.

"Suicide has become the third leading cause of death among youths. That young people feel such despair that they attempt to take their own lives is troubling, confusing and frightening. Talking about the facts of depression and becoming informed about the causes and signs of suicidal thoughts are the first steps in prevention."

The discussion will contain an overview of adolescent depression, the signs and symptoms of suicidal depression and types of intervention.

Persons interested in enrolling in this program may call the school at 493-3573 to pre-register.

Coffee County School Board Votes To Close Goodman School

The last of Coffee County's rural, community schools closed its doors for good last week when the Coffee County Board of Education voted to close the Goodman school and consolidate its students with those at New Brockton and Kinston.

The action came at a special meeting of the county board on Friday, May 31, at Kinston High School.

County Supt. of Education John W. Vaughan passed out a detailed study of the problems at Goodman to all the board members and publicly

identified the problems to all present at the meeting. The figures showed Goodman finished the school year with a student population of 143 in grades kindergarten - nine, while the projected enrollment for 1985-86 was 142. The projected enrollment per grade was:

Kindergarten - 10
1st Grade - 16
2nd Grade - 11
3rd Grade - 13
4th Grade - 10

5th Grade - 18
6th Grade - 18
7th Grade - 13
8th Grade - 22
9th Grade - 11

"New Hope had a population of 152 when we closed it last year," stated Vaughan, "and we told everyone involved that if Goodman's enrollment slipped to that figure action would be taken. The decline in student population has been evident for a number of years and has fallen from 229 in 1980 to 172 in the fall of 1984 and now to 142."

The declining enrollment has resulted in a severe cutback in teacher funding at Goodman, added Supt. Vaughan, and figures showed that if the school was reopened for the 1985-86 school year the state would only provide funding for five teaching slots, including a principal. The additional positions would have to be paid by the county at a minimum cost of \$125,000.

Goodman was the only school in the county that was not accredited," said Vaughan, "and it too was a result of not having the enrollment to justify adding extra teachers. Under the new 'Plan For Excellence,' Goodman wouldn't have been able to offer its students even the required courses."

Under the "Plan For Excellence" the limited faculty would have prevented such curricular and extra-curricular courses and activities as Spanish (grades 7-9); home economics and home and personal management (required in grade 8); algebra (needed in grade 9 to pursue Honors Diploma); typing; guidance counselors; music, chorus and band; librarians; computer literacy and volleyball, football and girls' basketball.

A detailed sheet listing expenses above state allocated funds showed a yearly savings of \$200,000 to the county system after the closing of Goodman.

The list included:
Teacher salary \$125,000
Aids salary \$7,900
Lunchroom salary \$14,200
Custodian salary \$7,380
Bus drivers \$10,397
Secretary salary \$8,670
Utilities \$3,600
Transportation \$11,598
Misc. \$10,000

A vocal group of Goodman supporters questioned the plan to close the school and stated if school zones were enforced the school would have enough students to remain open. Some of the supporters argued the financial savings listed and declared if the school was closed all the recent renovations would just be a waste of taxpayers' money.

Mayor Urges All Citizens To Stop Watering Lawns

A critical shortage of water in Elba has prompted Mayor Bob English to urge all citizens to stop watering lawns until further notice.

"We are hearing an emergency situation," stated English, "and to avoid a mandatory curfew in usage, all citizens must use water only when absolutely necessary. If the voluntary program doesn't work we will use police to enforce the curfew."

County School Board Receives \$225,000

To Aid In Rebuilding Vocational School

The Coffee County Board of Education held a special meeting on Friday, May 31, at Kinston High School and after a lengthy discussion on the closing of Goodman School (see related news story) handled routine business.

Supt. John W. Vaughan told the board that the state had given the county system \$225,000 to rebuild the vocational building at Kinston High School. The building burned recently and the county has applied for special funding to aid in the construction of a new building.

While Vaughan stated the funds would not cover all the rebuilding expense, he said he was thankful for the funds and said he would personally thank the governor.

The results of the Stanford Achievement Test were revealed and students in the county system ranked tops in the state among county students.

"I'm excited and proud of the results," stated Supt. Vaughan, "and it reflects the fine job the teachers in the system are doing."

The board announced the employment of four new teachers to fill vacancies in the system. Employed were: Jimmy Pickle - math teacher at New Brockton; Mike Harrelson - vocational agriculture teacher at Kinston; Mrs. Hartin - biology teacher at Kinston; and Lynn Cook - Spanish teacher in the system (contingent upon completion of studies).

General Telephone Customers Will Notice

\$1 A Month Increase In Phone Bills

On June 1, a new \$1 a month nationwide "subscriber line charge" became effective for residential and single-line business telephone customers.

General Telephone customers will begin seeing the charge on their June bills. Because the charges are billed in advance and retroactive to June 1, most customers will pay a full month's charge plus a partial month's charge, causing the first such fee to be more than \$1. But subscriber line charges of future bills will be exactly \$1.

At the same time, AT&T will reduce rates for many long-distance calls. The reduction will vary, depending on the time of day a call is placed and the distance between the calling and destination points, but rates will go down an average of 5.6 percent.

Subscriber line charges are scheduled to increase to \$2 in June 1986.

These new charges, formerly called "access charges," are fees established by the Federal Communications Commission (FCC) to help cover the costs of lines and other equipment connecting customers' telephones to each local telephone company's equipment. Business customers with more than one telephone line have been paying the fees since May 1984.

GTE customers may request a free brochure further explaining subscriber line charges by writing to the Public Affairs Department, General Telephone Company, 4100 Roxboro Road, P.O. Box 1412, Durham, NC 27702.

11th Circuit Court Of Appeals To Hear

Latest Appeal Of Billy Joe Magwood

Billy Joe Magwood, convicted of murder and sentenced to die in the electric chair for the shooting death of Coffee County Sheriff Neil Grantham, may soon be headed back to court in his continuing appeal of the death sentence.

THE END OF THE SCHOOL YEAR AND THE END OF THE SCHOOL... Only the school secretary and one student were at Goodman School last Friday morning when word came that the county school board had voted to close the rural school that housed 142 students in grades K-9.

The supporters asked the board to delay its decision for at least two weeks to give the members of the community a chance to study ways of raising needed funds. A public meeting at the school was also requested to allow board members to meet with more members of the community.

The board asked Supt. Vaughan for a recommendation and he stated, Supt. Vaughan states

"Action is in best interest of children"

In an interview with THE ELBA CLIPPER, Supt. Vaughan stated, "I'm thinking about the students Goodman first and I have to place their best interest over all other considerations."

"The county school officials have watched the declining enrollment at Goodman since 1969," said Vaughan, "and the state recommended closing it in 1970; however, the school was maintained as long as possible. The decline in enrollment was due in part to a declining birth rate and also the decline in people involved in agriculture. This past year Goodman was the smallest K-9 school in the state. For the past year, the school board spent more money per student in Goodman than at any other school in the system."

"Some will say we've thrown money away at Goodman in recent years," added Vaughan, "but the extensive renovation was an attempt to keep the education process high and to encourage future enrollment. I don't think any school system in the state watches its finances more than we do and I assure everyone that all money spent was in the best interest of the students at Goodman."

"To keep Goodman open would have cost a minimum of \$175 - 200,000," said Vaughan, "and to meet all academic requirements would add at least another \$100,000 in teacher salaries alone."

"Coffee County will now have three solid schools (Zion Chapel, Kinston and New Brockton)," said

Vaughan, "and thru recent consolidation the student enrollment at all the schools is up, which will raise the quality of education. Most of Goodman's students will transfer to New Brockton and the addition of the students will do nothing but add to the quality of the already high standards present."

In closing, Supt. Vaughan stated, "Emotionally, no one wants to close a school. However, anyone who studies the facts and figures would have to agree the decision is best for the children."

It was announced following the meeting that no teachers would lose a job because of the closing and that the school building would not be allowed to deteriorate or become an eyesore to the community.

Supt. Vaughan

Appointed To Committee

Coffee County Supt. of Education John W. Vaughan has been appointed to serve on a 35-member committee that will design the state's first evaluation system for teachers.

AEA appointed 15 educators to the committee, state school Supt. Wayne Teague had 15 appointments and Gov. George Wallace had five.

Vaughan, who was appointed by Supt. Teague, stated, "I support a good career ladder plan and I feel confident one can be devised. I think the committee needs to develop a tough criteria to get the best teachers in the classroom and to award the top teachers with top pay."
